

LISTS OF POTTERY FOUND IN THE NEW KINGDOM TOWN OF SAI ISLAND, SECTORS SAV1 EAST AND SAV1 WEST

Julia Budka

Introductory remarks

Over the course of the ERC AcrossBorders project's 2013–2017 campaigns in the areas SAV1 West and SAV1 East on Sai Island rich ceramic material was discovered. The ceramics are here presented in tables which are firstly arranged according the two excavation areas SAV1 East and SAV1 West and the years of the discovery.

Within this framework the internal structure of each table consists of the arrangement of the respective ceramics with their find numbers after their specific location and according to their SU (stratigraphical unit, used from 2014 onwards) or level (2013). The numbering system is based on the find number and the year of discovery. For this system, a clear separation between numbers from SAV1 East and SAV1 West was introduced in 2014 when work started to be conducted at both sectors simultaneously.

The lists are based on the original find lists created in the field from 2013 to 2017; this digital version was created by Veronica Hinterhuber in 2018 and modified and finalised by the author in 2020.
